

ProForce Industry OÜ Safety Policy

Commitment to safety

We ensure that all operations comply with the latest safety regulations and industry standards. Our team regularly assesses and mitigates risks to protect workers, maintain project integrity, and promote a culture of safety.

Training and competence

All employees receive comprehensive safety training, including protocols, procedures, and proper equipment use. This ensures that every worker is well-prepared to perform their job safely and efficiently.

Personal protective equipment (PPE) and equipment safety

We provide the necessary PPE for every task and ensure that all tools, machinery, and equipment are regularly maintained. Employees are trained on proper equipment handling to prevent workplace accidents.

Emergency procedures and first aid

All workers are trained in emergency procedures, and all teams have first aid givers. We ensure that first aid resources are always accessible, empowering our team to respond effectively in case of an incident.

Incident reporting and continuous improvement

We foster a culture of transparency by encouraging workers to report incidents and near misses. These reports help us continuously improve our safety standards through regular reviews and proactive risk management.

Leadership and accountability

Our leadership team sets clear safety expectations, provides the necessary resources, and holds every employee accountable for maintaining a safe workplace. Safety is a shared responsibility that drives our success.

At **ProForce Industry**, safety is not just a requirement—it's a commitment we uphold every day.
